

National Spatial Strategy

-National Plan-

July 2008

National Spatial Strategy —National Plan—

Part 1 Basic Conception for National Spatial Strategies.....	1
Chapter 1 Trends of the Times and Challenges for National Land Policy.....	1
Section 1 Drastic Transformations in the Socioeconomic Environment... ..	1
(1) Advent of a decreasing and rapidly aging population.....	1
(2) Globalization and economic growth in East Asia.....	2
(3) Advances in information and communication technology.....	3
Section 2 Changes in and Diversification of National Values	3
(1) Growing concerns over safety, security, the global environment, and attractive landscapes.....	3
(2) Diversification of lifestyles; expansion of groups that can play a “public” role.....	4
Section 3 National Land Situation.....	5
(1) Current national land structure: unipolar and uniaxial.....	5
(2) Autonomous regional development; increase in issues beyond prefectural boundaries.....	5
(3) Need to reorganize the nation and the national land in response to population decline.....	6
Chapter 2 National Land Structure for the New Era.....	7
Section 1 New National Land Vision.....	7
Section 2 Time Frame of Plan.....	9
Section 3 Cooperation Between National and Local Governments to Create Autonomous Regional Blocks.....	9
Chapter 3 Strategic Goals for Realizing the New National Land Vision.....	10
Section 1 Effective Communication and Collaboration with East Asia.....	11
(1) Strengthening national industries under the industrial structure of the East Asia network.....	12
(2) Common issues throughout East Asia; cultural exchange; human resources.....	13
(3) National land infrastructure for smooth exchange and linkage.....	14
Section 2 Development of Sustainable Local Communities.....	14
(1) Sustainable and comfortable urban areas.....	15

(2) Vitalization of industries utilizing regional resources.....	17
(3) Attractive and comfortable rural areas; new prospects for the agriculture, forestry and fisheries industry.....	18
(4) Interregional exchange and linkage; encouraging internal migration to rural areas.....	20
Section 3 Creation of a Resilient Nation Resistant to Disasters.....	22
(1) Disaster countermeasures; disaster damage reduction.....	22
(2) Disaster-resilient national land structure.....	23
Section 4 Management of a Beautiful National Land for Future Generations.....	24
(1) Proper management of national land; recycling and symbiosis.....	24
(2) National land use in river basin spheres; water circulation system.....	26
(3) Proper use and conservation of sea areas.....	26
(4) Creation of attractive national land; protection of the entire national land.....	27
Section 5 Development of Local Communities Based on "New Public".....	28
(1) Regional development systems centered on the "new public".....	29
(2) Regional development through self-help; ideas and activities led by private entities.....	30
Chapter 4 Realization of the Plan.....	31
Section 1 Direction of National Land Infrastructure Investment.....	31
Section 2 Improvement/Utilization of National Land Information; Monitoring the Plan.....	33
Section 3 Review of Various Measures Related to the Plan.....	34
Section 4 Linkage with the National Land Use Plan.....	35
Part 2 Basic Direction of Measures in Each Field.....	36
Chapter 1 Regional Development.....	36
Section 1 Quality of residential Life; Safety and Security.....	37
(1) Quality housing; housing safety net.....	37
(2) Creation of a good housing environment.....	38
(3) Community efforts.....	39
Section 2 Livable and Vibrant Urban Areas.....	40

(1) Increased urban functions through mutually beneficial relationships between municipalities	40
(2) Urban areas as the source of vitality; strengthening linkage between them.....	42
Section 3 Attractive and Comfortable Rural Communities.....	43
(1) Comfortable, safe, and attractive rural areas.....	44
(2) New efforts for vitalizing rural areas.....	46
(3) Symbiosis and interrelationships between urban and rural areas.....	47
Section 4 Interregional Exchange and Linkage; Encouraging Internal Migration to Rural Areas.....	47
(1) Interregional exchange and linkage.....	47
(2) Promotion of dual habitation.....	48
(3) Human resources from outside the region.....	48
Section 5 Individual Regional Development Based on Geographical, Natural, and Social Conditions.....	49
(1) Remote islands.....	49
(2) Area with heavy snowfall.....	50
(3) Mountain villages.....	51
(4) Peninsula areas.....	52
(5) Depopulated areas.....	52
Chapter 2 Basic Measures Concerning Industries.....	53
Section 1 Science and Technology Supporting Innovation.....	54
(1) Developing innovation and strengthening competitiveness.....	54
(2) Infrastructures supporting science and technology.....	55
Section 2 Development of Industries as Engines for Regional Blocks; Employment Supporting the Region.....	55
(1) Development of attractive environments for industrial locations.....	55
(2) Boosting SMEs and industries based on regional resources.....	56
(3) Boosting the service industry.....	57
(4) Improving labor supply to rural areas.....	57
Section 3 Stable Food Supply and Revitalization of the Agriculture, Forestry and Fisheries Industry.....	58
(1) Stable food supply.....	58
(2) Establishing a desirable agricultural structure and strengthening competitiveness.....	59

(3) Structuring resource recycling and forest management systems by revitalizing the forestry and logging industry.....	61
(4) Appropriate management of fishery resources; strengthening international competitiveness of the fishery industry.....	63
Section 4 Realization and Sending of the World's Most Advanced Energy Supply-Demand Structure.....	64
Chapter 3 Basic Measures Concerning Culture and Tourism.....	65
Section 1 Affluent and Vibrant Communities Nurtured Through Cultures.....	65
(1) Conservation, handing down, creation and utilization of unique regional cultures.....	66
(2) Opportunities for participating in cultural and artistic activities.....	67
(3) Intercultural exchange.....	68
(4) Development of an environment supporting cultural and artistic regional activities.....	68
(5) Creation and transmission of a new Japanese culture.....	69
Section 2 Boosting Regional Growth Through Tourism.....	70
(1) Developing internationally competitive touristic attractions.....	70
(2) A new kind of tourism; human resource development.....	70
(3) Improvement of cultural capacity through exchange.....	71
Chapter 4 Basic Measures Concerning Transportation and Information Communication Systems.....	72
Section 1 Comprehensive Transportation and Information Communication Systems.....	73
(1) Measures to strengthen competitiveness of international transportation and information and communication bases.....	73
(2) Measures for promoting direct exchange with East Asia.....	76
Section 2 A National Land Arterial Transportation System Promoting Interregional Exchange and Linkage.....	78
(1) Comprehensive land transportation networks.....	79
(2) Efficient maritime transportation networks.....	79
(3) Domestic air transportation networks.....	80
Section 3 Regional Transportation/Information Communication System.....	80
(1) Information and communication systems supporting regional	

dynamism.....	81
(2)Transportation systems for sustainability and comfort.....	84
(3) Transportation supporting daily life.....	87
Chapter 5 Basic Measures Concerning Disaster Prevention.....	88
Section 1 Comprehensive Disaster Prevention Measures.....	88
(1)Efficient and Effective Disaster Prevention Facilities.....	88
(2) "Soft" measures for reducing disasters.....	89
(3) Wide area disaster prevention / crisis management systems and regional disaster prevention capacities.....	90
(4) Disaster-resilient national land spaces.....	92
Section 2 Specific Measures for Accurately Responding to a Wide Range of Natural Disasters.....	93
(1) Countermeasures against earthquakes and tsunamis.....	93
(2) Countermeasures against wind and flood damage, heavy snowfall and storm surges.....	94
(3) Countermeasures against volcanic eruptions.....	95
Chapter 6 Basic Measures Concerning Use and Conservation of National Land Resources and Sea Areas.....	96
Section 1 National Land Management Focusing on River Basin Spheres.....	97
(1) Sound water circulation systems.....	98
(2) Comprehensive measures for sediment management.....	100
Section 2 Safe and Secure Water Resources and Their Use.....	102
(1) Drought-resilient regional development.....	102
(2) Clean and pleasant-tasting water.....	103
(3) Steady maintenance, management and renovation of facilities related to water resources.....	103
Section 3 Handing Down Beautiful Forests to Future Generations.....	104
(1) Diverse and sound forests; national land conservation.....	104
(2) Afforestation in cooperation with the people.....	105
Section 4 Enhancement of Farmland Use.....	106
(1) Enhancement of farmland use.....	106
(2) Improvement of farmland conservation.....	107
Section 5 Use and Conservation of Sea Areas.....	107

(1) Converting sea areas into national energy.....	108
(2) Handing down sea areas to future generations.....	108
Section 6 “Whole Nation Land Care”	109

Chapter 7 Basic Measures Concerning Environmental Conservation and Creation of Landscapes.....111

Section 1 Material Circulation Where Human Activities and Natural Processes are Harmonized.....	112
(1) Countermeasures against global warming.....	112
(2) Material circulation; sound material-cycle society.....	113
(3) Countermeasures against atmospheric and ground pollution.....	114
Section 2 Sound Ecosystems.....	115
(1) Conservation and restoration of nature through ecological networks.....	116
(2) Conservation, restoration and sustainable use of satochi-satoyama areas....	116
(3) Promoting contact with the nature.....	117
(4) Conducting environmental assessments.....	117
Section 3 Conservation and Creation of Attractive Landscapes.....	117
(1) Sound and attractive landscapes.....	118
(2) Distinct regional landscapes.....	118

Chapter 8 Basic Measures for Developing Local Communities Based on “New Public”.....119

Section 1 Establishing the “New Public”; Developing an Environment for its Activities.....	230
(1) Raising awareness; opportunities for participation and experience.....	119
(2) Expansion of participating entities.....	120
(3) Supporting activities by a wide range of entities.....	121
Section 2 Management of National Land Infrastructure by a Wide Range of Entities.....	121
Section 3 Regional Development Through Self-Help; Ideas and Initiatives Led by a Wide Range of Private Entities.....	122
(1) Utilization of regional resources and information transmission.....	122
(2) Wide ranging participation in regional development; gradual institutionalization.....	123

(3) Securing of funds through “Small circulation of funds” and “Purposeful investments”.....	123
(4) The role of the government in regional development.....	124
Part 3 Formulation and Promotion of the Regional Plan.....	126
Chapter 1 Basic Conception.....	126
Section 1 Meaning and Roles of the Regional Plan.....	126
Section 2 Basic Conception for the Regional Plan.....	126
(1) Creating autonomous regional blocks.....	126
(2) The current situation of each block; potential for autonomous development.....	128
(3) Cooperation and mutual adjustments between regional blocks.....	130
Section 3 Aligning the National Plan and the Regional Plan.....	131
Section 4 Aligning the Comprehensive Development Plan of Hokkaido and the Okinawa Promotion and Development Plans with the National Spatial Strategies.....	131
Chapter 2 Formulation of an Individualised Regional Plan.....	133
Section 1 Agendas to be Considered.....	133
Section 2 Planning Regional Strategies.....	134
