International Affairs Division, Land Economy and Construction Industries Bureau

Japan and Singapore formed Roundtables to Explore Joint Infrastructure Projects (summary of results)

~Strategic partnership with the Government of Singapore to promote overseas infrastructure development~

The Ministry of Land, Infrastructure, Transport and Tourism (“MLIT”) and the Government of Singapore jointly held the Roundtable on Exploring Joint Infrastructure Projects between Japan and Singapore (“Japan-Singapore Joint Roundtable”) twice, in February and March respectively, with an aim to develop infrastructure in neighboring countries through cooperation by the two nations.

With global demand for infrastructure rising in recent years, many Japanese companies have established their base in Singapore to expand business in Asia.

In this context, the Japan-Singapore Joint Roundtable was held with participation from government agencies and companies in the urban and infrastructure sectors to share advanced policies and competencies of the two countries. As Japan and Singapore mutually complement the funding capabilities for infrastructure projects, the Roundtable also discussed various approaches to develop infrastructure in Asia through the bilateral partnership between Singapore and Japan.

MLIT intends to continue the promotion of future overseas infrastructure development by strengthening the strategic partnership with Singapore.

For details of the Japan-Singapore Joint Roundtable, please refer to the appendix.
