Japan Association for Smart Cities in ASEAN (JASCA) was established as a framework to facilitate cooperation between ASEAN and Japan, and is composed of potential Japanese Partners both public (7 ministries, 11 cities, 16 public sectors) and private (more than 260), from various fields that have interests towards ASEAN.

It acts as a Project Incubator to promote Smart City Projects in ASEAN, a Communication Hub to enhance Public-Private Actions for Partnership and a Total Solution Coordinator for cross-cutting and comprehensive solutions.

It contributes to ASCN by providing Japan's know-how, experience, technology and financial scheme, aiming to create PPP projects or supporting projects funded by ODA or local governments.
